Operating Results and Financial Statements

1. Summary of business performance

In Japan's economy severe employment conditions continued during the first quarter (the three-month period from January 1 to March 31, 2010) and the capacity for a self-sustaining recovery of domestic demand remained weak. Despite this, exports and production increased due to an improvement in overseas economies and other factors, and corporate profits showed a recovering trend.

In the Group's operating environment, conditions in the Pharmaceuticals business remained challenging due to policy measures in the domestic market to promote generic pharmaceuticals, increased competition from European and American drug manufacturers and major domestic pharmaceutical companies, and intensifying international competition in new drug development. The Bio-Chemicals business was affected by lower prices due to the rise of Chinese and other manufacturers. Although some recovery in demand has been seen in the Chemicals business, due to trends in raw materials prices and exchange rates, circumstances remain hard to predict.

Against this background, the Kyowa Hakko Kirin Group pursued growth worldwide by providing new value to meet a diverse range of needs in order to realize our vision of becoming a world-class, R&D based life sciences company, founded on biotechnology with the pharmaceutical business at its core.

Note: Comparisons with the previous comparable fiscal period shown below are with figures for the three-month period January 1 to March 31, 2009. Due to a change in the fiscal year end in fiscal 2009 these figures were obtained by subtracting figures for the first nine months of the fiscal year ended March 2009 from figures for the twelve-month period ended March 31, 2009.

In the first quarter, despite the effects of the exclusion from consolidation of the Food business, a recovery in the Chemicals business and other factors led to consolidated net sales of ¥99.2 billion, up by 1.4% compared to the first quarter of the previous year (January 1 to March 31, 2009). Profits benefited from an improvement in profits in the Chemicals business and lower SG&A expenses compared to the first quarter of the previous year. As a result, first quarter operating income was ¥11.5 billion (up 328.4%), and recurring income was ¥11.9 billion (up 279.5%). Net income was ¥6.0 billion (up 386.9%) showing a large increase compared to the first quarter of the previous year, which was affected by extraordinary losses including impairment losses.

Segmental performance

Note: Segmental results shown below exclude figures for the Food business that was consolidated in the comparable period of the previous year.

Pharmaceuticals

In the Pharmaceuticals business, consolidated net sales were ¥49.6 billion (up by 1.1% compared to the same period of the previous year period), while operating income was ¥9.6 billion (up 87.2%) due to lower R&D expenses and other factors. Domestic sales of core products including the anemia treatments Nesp and Espo,

KYOWA KIRIN

and Regpara, a treatment for secondary hyperparathyroidism during dialysis therapy, continued to grow. However, sales of Allelock, an antiallergic agent, and Patanol antiallergic eyedrops, were lower than in the comparable period due to lower amounts of airborne pollen in Japan and other factors. In the licensing-out of technologies and export of pharmaceutical products, revenues increased significantly due to increased income from technology licensing, in particular anti-allergic olopatadine hydrochloride, along with a strong performance from exports to Asia.

In new drug development in Japan, new drug applications were filed for KW-2246, an analgesic for cancer pain in February, and for AMG 531, a treatment for idiopathic thrombocytopenic purpura in March. Overseas, approval was received in March in South Korea and Taiwan for Regpara, a treatment for secondary hyperparathyroidism during dialysis therapy.

Bio-Chemicals

In the Bio-Chemicals business, consolidated net sales were ¥22.2 billion (up by 6.2% compared to the same period of the previous year), while operating income was ¥1.0 billion (up 10.2%). Sales of pharmaceutical and industrial use raw materials, primarily amino acids, nucleic acids and related compounds, increased due to strong sales volume growth to Asia of amino acids for pharmaceuticals and intravenous liquids. Sales at Daiichi Fine Chemical declined slightly due to sluggish sales of bulk pharmaceuticals and intermediate products.

In healthcare products, there was a strong increase in customer numbers for mail-order *Remake* series and sales of health food materials also increased.

Chemicals

In the Chemicals business, consolidated net sales were ¥30.2 billion (up by 154.9% compared to the same period of the previous year), and operating income was ¥0.6 billion (compared to an operating loss of ¥3.5 billion in the comparable period of the previous year) partly due to the inclusion in the Chemicals segment of consolidated subsidiaries Miyako Kagaku and Kashiwagi Corporation, which were previously included in the Other segment.

Compared to the large fall in demand due to the effects of the global economic recession experienced in the same quarter of last year, demand recovered in Japan and overseas, and sales volumes were significantly higher. In particular overseas markets were strong, supported by buoyant demand in China.

Other

Due to changes in segment classifications, sales in the Other segment were ¥2.4 billion (down by 82.5% compared to the same period of the previous year), while operating income was ¥0.0 billion (up 142.5% compared to the same period of the previous year).

Results by Region

Japan

Net sales in Japan were ¥95.5 billion (up 1.5%) due to the strong recovery in the Chemicals business and other factors and despite the effects of the exclusion of the Food segment. Operating income was ¥10.3 billion yen, a major increase of ¥9.7 billion compared to the same period of the previous year due to lower SG&A expenses, such as those in R&D, and the return to profitability of the Chemicals business.

Other regions

The sales performance of overseas subsidiaries in the Pharmaceuticals and Bio-Chemicals was in general good and net sales in other regions were ¥12.4 billion (up 19.7%). However, lower technology licensing income at overseas subsidiaries led to operating income of ¥1.1 billion (down 43.6%).

2. Summary of financial position

Total assets at the end of the first quarter were ¥684.7 billion, a decline of ¥10.4 billion compared to the end of the previous fiscal period. The main reasons for the reduction were declines in short-term loans, and accounts and notes receivable. Liabilities were ¥ 141.9 billion, ¥12.9 billion lower than at the end of the previous fiscal period due to declines in accounts and notes payable and income taxes payable, as well as a reduction in accrued expenses following payments resulting from the completion of large facilities. Net assets at the end of the first quarter were ¥542.8 billion, up by ¥2.4 billion due to the recording of net income for the period and despite the effects of dividend payments and other factors. As a result our equity ratio at the end of the first quarter was 78.7%, 1.6 percentage points higher than at the end of the previous fiscal period.

Cash flow summary

Cash and cash equivalents at the end of the first quarter were ¥58.0 billion, a decline of ¥5.7 billion compared to the end of the previous fiscal period. The main cash flows and factors affecting them during the first quarter were as follows:

Net cash provided by operating activities was ¥7.0 billion. The primary contributory factors were net income before income taxes of ¥11.3 billion, a decline in trade receivables of ¥4.7 billion, and depreciation expenses of ¥4.2 billion. The main cash outflows were corporate tax payments of ¥6.9 billion and a decline in trade payables of ¥5.9 billion.

Net cash used in investing activities was ¥9.1 billion. The main outflows were expenditures such as the expenditure of ¥9.5 billion for the acquisition of fixed assets.

Net cash used in financing activities was ¥3.5 billion. The main outflow was dividend payments of ¥2.7 billion.

3. Consolidated results forecasts

No revisions have been made to the consolidated results forecasts that were announced on January 29, 2010.

4. Other

- (1) Changes to subsidiaries during the period (Changes to the scope of consolidation following changes to specific subsidiaries): None
- (2) Use of simplified accounting methods or special accounting procedures:
Calculations for tax expenses use an estimated effective tax rate for net income before taxes based on reasonable assumptions of an effective tax rate after the application of tax effect accounting for net income before income taxes for the consolidated fiscal year, including net income before income taxes of the three-month period under review. Corporate tax adjustment has been included in corporate and other taxes.
- (3) Changes in accounting methods, procedures and presentation used in the preparation of these financial statements: None
